

Corner Impact Test Fixture

BQ Technologies' corner impact test fixture is designed to measure a card's ability to resist delamination and cracking when subjected to an impact. The fixture is capable of performing two card impact tests, corner and static stress. There are two separate fixtures that attach to the stand; one for corner and one for static stress. Its adjustable jaws allow use with various card thicknesses. The test fixture is easy to use and gives repeatable results.

BQ Technologies' corner impact fixture features a heavy duty custom CNC design with a small footprint to allow convenient benchtop use.

The corner impact test fixture is designed to perform tests according to the following standards:

- Mastercard CQM
- ANSI INCITS 322

Static Stress Fixture
